

Sources of Asbestos in the Home

- | | |
|---|--|
| 1 Roof felt and shingles | 14 Asbestos pad under the fireplace hearth |
| 2 Roof gutters can be made of asbestos cement | 15 Backing behind recessed lighting |
| 3 Deck undersheeting | 16 Insulation on electrical wires |
| 4 Asbestos can be found in stucco | 17 Main panel and fuse box; each fuse wire has an individual asbestos flash guard |
| 5 Soffit boards can be made of asbestos cement or asbestos insulating board | 18 Pipe insulation |
| 6 Asbestos cement (transite) board siding and undersheeting | 19 Heat reflector for wood stove |
| 7 Downpipes can be made of asbestos cement | 20 Furnace duct tape |
| 8 Window putty | 21 Boiler and furnace insulation |
| 9 Loose, blown-in insulation, such as vermiculite | 22 Door and cover gaskets |
| 10 Textured or stipple-coated walls and ceilings | 23 Outlets and switches |
| 11 Incandescent light fixture backing | 24 Flooring: vinyl tiles and linoleum sheet flooring; flooring adhesive |
| 12 Acoustic tiles | 25 Gypsum board filling compound, and patching and joint compound for walls and ceilings |
| 13 Artificial fireplace logs and ashes | |

Please note: This floor plan depicts a typical older home. Asbestos use has declined significantly; homes built before 1990 are more likely to contain asbestos products.
